# **ESCALATE v3 Tag View Model (tag management: vw\_tag\_type, vw\_tag)**

Gary Cattabriga | July 13, 2020

### Managing Tag Types (vw\_tag\_type)

tag\_type

**note:** short\_description must be unique

### select \* from vw\_tag\_type

tag_type_uuid	short_description	description	add_date	mod_date
tt111	material	tags used	2020-01-01	2020-01-01
tt231	experiment	assist in	2020-01-01	2020-01-01

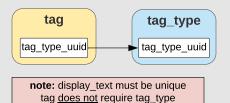

insert into vw\_tag\_type (short\_description, description, actor\_uuid) values ('material', 'material type', aa123); returns tag\_type = tt111

update from vw\_tag\_type set description = 'tags used to assist in identifying material types' where tag\_type\_uuid = tt111

delete vw\_tag\_type where tag\_type\_uuid = tt111

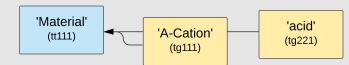

**note:** <u>no</u> cascade delete on tag\_type on delete, associated notes are deleted

## Managing Tags (vw\_tag)

### select \* from vw\_tag where tag\_type\_short\_descr = 'material'

tag_u	ıid display_text	description	actor_uuid	actor_description	add_date	mod_date	tag_type_uuid	tag_type_short_descr	tag_type_description
tg11	A-Cation	a-cation	aa123	J Doe	2020-01-01	2020-01-01	tt111	experiment	tags used
tg22	1 acid		aa124	J Smith	2020-01-02	2020-01-02	tt231	material	tags used

insert into vw\_tag (display\_text, description, actor\_uuid) values ('A-Cation', 'a-cation', aa123); returns  $tag\_uuid = tg111$ 

update from vw\_tag set tag\_type\_uuid = (select tag\_type\_uuid from vw\_tag\_type where short\_description = 'material') where tag\_uuid = tg111

delete vw\_tag where tag\_uuid = tg111

note: on delete, associated notes are deleted
